**IT PAYS TO PLANT TREES****LIST—SURPLUS EVERGREENS AT LOW PRICES**

CHRISTMAS TREES have become a very valuable Farm Crop. However, only about 5% of the trees cut are from farmers transplanted stock. At the present level a Christmas tree crop can pay up to \$1,000.00 per acre in from 8 to 10 years after planting. Opportunity is said to only knock once. Last year we had so many 100-tree orders, we are again offering best varieties to plant at very low prices including PREPAID Delivery. We have had over 30 years experience marketing Xmas trees, thus can advise best planting sellers.

OFFERING Douglas and Balsam Fir, Austrian and Scotch Pine, Norway, Red and White Spruce, 2 yr. seedlings, average size 2 to 4 inches and up. Your choice of two varieties, 100 Trees for only \$3.00 Prepaid. (Engelmann Spruce.)

SPECIAL

Riga Scotch Pine 2 yr. Seedlings	\$13.00 per 1000
	\$25.00 per 2000. Prepaid Delivery.
Riga Scotch Pine 3 yr. Seedlings 7-14 inch	\$32.00 Per 1000
	3000 for \$75.00. Prepaid Delivery.

HOW TO PLANT

When the seedlings are removed from the "heeling-in" trench, they should be immediately placed in a pail or bucket, which should contain several inches of thin mud to keep the roots moist. If the roots become dry the trees may die.

Two men work to best advantage in planting small tracts. The first one makes the holes with a grubbing hoe or mattocks or other similar planting too. The second man follows with the seedlings and places one tree in each hole, slightly deeper in the ground than it stood in the nursery, and with trees in place with roots properly placed (not cramped), soil should be packed around roots and firmly tamped with mallet or heel of shoe. All air spaces should be removed, otherwise tree will die.

Winchester, Mass.

Unadilla Nursery
Johnson City, N. Y.

Dear Sirs:

About 12 years ago I started planting evergreen trees that I bought from the state for sale as Christmas trees. Now I have 10,000 growing and have sold them for the last 4 years starting with sales of \$38.50 and this year sold \$307.00 worth.

However, there is one new development, people seeing the evergreens would like to buy them for Landscaping. Since I agreed not to sell them as rooted stock when I bought them from the state, I thought I would inquire if you could sell perhaps one thousand or more in variety which I could grow and sell as rooted stock.

Please quote prices if you have any such to offer.

Sincerely,
James A. Cullen

Surplus Evergreens, Christmas Trees, Landscape Specialities

Very Low Wholesale Prices—Some Items Prepaid Delivery

"We cannot live without trees." They will grow and work for you. Your opportunity, your Ranch House, back lot, or any unimproved land, weed-patch will grow trees that will pay big dividends. We planted Red Pine that produced boards and timbers for building purposes in 25 years. Vacation lands when planted to trees can be converted into cash value lots. Community planting projects in 47 States are producing an annual income to reduce taxes, build schools and other municipal improvements. The beauty of the trees alone makes the planting of trees a well worthwhile investment.

We recommend the following for FORESTS PLANTINGS—

Red Pine, Scotch Pine, White Pine, Norway Spruce. 2 yr. Seedlings, 3-5 inch, \$25.00 per 1000. PREPAID.

Discounts on large orders. When you plant Unadilla TREES you have your project entirely under your own control.

BLUE SPRUCE is one of our best sellers. We have had over 45 years of experience in selecting the best strains. Our trees have a very high percentage of blues. Might say that we have planted many specimens that later became worth from one to two hundred dollars to the owner, also equalled this price to his or her real estate. The trees offered will work for you. A tree that costs 7 cents in 100 lots may grow into a specimen worth the value as indicated above. Plan today to plant some of these trees around your Ranch, Home or Farm.

Blue Spruce	3 yr. Seedlings	4- 6 in.	\$ 7.00 per 100
Blue Spruce	4 yr. Transplants	6- 8 in.	15.00 per 100
Blue Spruce	4 yr. Transplants	7-10 in.	25.00 per 100
Blue Spruce	4 yr. Transplants	10-12 in.	35.00 per 100
Blue Spruce	5 yr. Transplants	12-15 in.	45.00 per 100
Blue Spruce Grafts, Morheim & Koster			2.00 each

Our trees are grown under irrigation, fertilized with best cultivation methods.

PLAN TO PLANT SOME OF YOUR FUTURE LANDSCAPE NEEDS

Lining out Baby Landscape Evergreens—Seedlings and Transplants RC. rooted Cuttings etc.

The Taxus or Yew Specie are the best and hardiest type of Dwarf Evergreens. Useful Lawn and Foundation specimens. Well adapted for low clipped hedges. The demand for the above is greater than the supply, can be planted on a variety of soils, drouth resistant and a very popular Evergreen. Reports indicate that our stock grows very satisfactory.
